

Apimac Clean Text - Read Me

What is Apimac Clean Text?

Often you have to paste some text copied from one document or application into another, and you want the text to get the attributes (such as color, font, dimension and style) of the new document instead of preserving the attributes copied from the old one. Apimac Clean Text eliminates all text formatting, preparing it for pasting. Moreover, the application performs other useful functions, such as removing empty lines, removing multiple spaces, removing tab characters etc. It's also very useful for printing out text without wasting ink and paper, as often happens when you print directly from a Web browser.

Limitations of the unregistered version

Apimac Clean Text is shareware. A shareware reminder window appears and forces you to wait for some seconds every time you open the program and some options as "Fix Paragraphs" and "Remove Returns" will become unavailable. To remove this limits, register your copy of the program.

For a complete list of prices and licenses, and to purchase online, please visit Kagi's Secure Registration Service. The URL for the page is:
